2. Participant's opinion about her personal & professional development

Internships in Spain are very cool. Being here I got to know Spanish culture and cuisine. I met many new people from different parts of the world. The weather was good to us, it was very sunny. Mrs. Magdalena, our coordinator, showed us around new, interesting places such as: Malaga, Ronda, Torremolinos, Nerja for which I thank her very much. She is a very nice and helpful person, we could always count on her.

Adam Kijko

1. Tutor's final note

6 (Excellent)

2. Participant's opinion about her personal & professional development

During these internships, I learned that I still know nothing about the world around me, because every day I felt pleasantly surprised not only by the employer and hotel employees, but also by the hotel residents themselves. Everyone was very nice but diligently performed the work entrusted to them. At first it seemed difficult, but everything passes with time, as well as adaptation to a different climate. Working with various people, not only religious but also national, was not a problem, I mainly communicated in English and a little bit in Spanish, sometimes in Polish, because there were also a few Poles. Each of the patients was extremely satisfied with my services, I felt proud of myself because learning at school brought results. In my free time, I traveled and visited various places, including Ronda, Malaga, Nerja, and Torremolinos itself; the beaches were divine as well as the hills on which Ronda is located. If I had the opportunity to go on an internship with Euromind through Erasmus again, I would not hesitate because this experience gave me wings as a future masseur. I highly recommend it.

I am satisfied with the practices. I learned a new way of making pharmacy and prescription drugs, a new way of taking and dispensing prescriptions. I got acquainted with the new work system and sanitary standards. It was great on trips to Ronda and Nerja, there were nice beaches, beautiful mountains, and amazing cities. In my free time I sunbathed on the beach and explored the area. The restaurant had delicious food. Magda was very helpful. I met nice and friendly people from different parts of the world.

PROJECT MANAGEMENT

1. Mobility Project Preparation & Induction

Before the arrival of your trainees in Spain, Euromind provided them with the pre-arrival guide, including useful information, local transport & social life, emergency numbers.

Euromind has also arranged Skype meeting with the participants in order to get to know them and to interview them.

After the Skype interview, Euromind created a Facebook group to which all the selected participants were invited, together with their Teachers. This way Euromind Coordinator had constant contact with the target group already before their arrival in Spain.

Once the Skype interviews were delivered, Euromind upon a thorough analysis of the participants' studies and profile provided each one of them with an adequate work placement.

Euromind took responsibility for preparing Learning Agreements individually for each participant and made sure that all the parties involved signed all the necessary documents.

On the first day after the arrival, Euromind organized the welcome session during which the participants got to know the Euromind team, were reminded about the programme agenda, accommodation rules and dissemination strategy options.

Later on, the participants were taken for a walk around the neighborhood to get to know the area and find out where banks, mail box, workplace, supermarkets, bus station are.

2. Monitoring & Monitoring

In order to make sure that the objectives of the Learning Agreement were going to be achieved and that the participants would be fully integrated in the companies' work culture, the monitoring was delivered by all of the parties involved in the project.

Euromind assigned a Mentor for the group of participant who was responsible for the introduction of the participants to the host organisation(s). During the work placement/training the Mentor delivered monitoring visits to the work placements in order to revise the tasks of the trainees, their progress as well learn from the first hand the level of satisfaction of both the participants and the host companies/ training centre tutor.

The mentor in cooperation with companies Tutors carried out the evaluations of the trainees in the middle and at the end of the trainings.

After obtaining the results of the half-way through evaluation, the Mentor met the participants to give them the results of this evaluation. The least favourable results were discussed with the participants in private so that both the Mentor and the trainees had the comfort of sharing the information and exchanging the opinions and finding solutions to some problematic issues.

Host organisations assigned a member of its staff as a tutor. The tutors from the host companies were responsible for helping, informing and guiding and supervising the work done by the participants. The tutors had regular meetings with the participants in order to assess their presence in the company as well as to discuss the tasks and responsibilities according to the needs of the company and the participants.

Euromind at the end of the programme during the goodbye session handed out evaluation sheets to the participants so that they could assess their stay in Spain, work placements, as well as the work of the Euromind.

Euromind was also available to the participants 24/7 in case of emergency.

3. Communication

EuroMind takes good care of successful communication between companies and trainees. Each evaluation of work is aimed at improving the quality of cooperation. Each party is thoroughly checked and assessed and the necessary improvements are introduced. Moreover, Euromind mediates in this supervisor-trainee collaboration by translating and solving language-connected complicated matters.

4. Dissemination strategy

Euromind took active part in the process of preparing and dissemination results of the project together with the sending organisation and participants.

While the trainees were in Spain, Euromind involved them in a number of activities the aim of which was to make students monitor and collect all the information related to the progress of their work placements and stay in Spain. The materials produced by the participant would be then used as tools for disseminating results by the school in their country and by the partner in Spain.

The participants could work in groups or individually. On the first day they needed to decide on the form or forms of recording their professional experiences.

As a rule the whole group needed to create a Facebook fan page as it is an effective and quick means of accessing large numbers of people. What is more, it is a form that appeals to young people as they can share their experiences instantly and receive instant feedback, too. The fan page is always linked to the Euromind's Facebook fan page. The sending organisation was also asked to do the same thing.

This way the material produced by the trainees reached bigger audiences and was more effectively disseminated.

Euromind also disseminates the project at a local level. It organises language and cultural exchanges between the international trainees and students from local vocational colleges. During those meetings both Spanish and International students are involved in a number of activities the aim of which is to get to know each other, share experiences related to work experiences and in general their stay in Spain. The students also exchange information about their countries and cultures.

5. Certification

To validate the acquired skills, the trainees, at the end of their stay, received complete proof of their participation in the project by means of several methods of recognition:

- Training Certificate
- Europass Mobility Certificate

CULTURAL PREPARATION

Cultural activities, Andalusian cities & places visited during the programme

Walk around Malaga city centre

On the walk around Malaga city centre the trainees were able to see Malagas oldest parts and explore its history. Dating back to almost 800 BC, Malaga is one of the oldest cities in the world. The tour passed by ruins from The Roman, Moorish and Christian civilizations including The Roman Theatre, The Alcazaba, The Cathedral of Malaga and St. Johns Church.

Nerja

Nerja, located on the eastern end of the Costa del Sol, has all of the elements needed to charm any visitor. Its annual average temperature of around twenty degrees Celsius, its beautiful mountain landscape of La Axarquía region, as well as its rugged coastline of beaches and cliffs, are just some of its attractions. Nerja has more than its fair share of fabulous beaches, Burriana and Torrecilla being the main ones, which boast 16 kilometres of powdery sand and sparkling clear water, and a splattering of small coves to explore. The old quarter of the town is still virtually unchanged with narrow, winding streets, whitewashed houses with wrought iron terraces overflowing with geraniums, on which a canary can sometimes be heard singing.

Ronda

Ronda is known for its cliff-side location and a deep chasm that carries the Guadalevin River and divides the town as well as many legends and love stories related to the construction of the town or its promotion. One of the well-known places is El Tajo Bridge - vertical, majestic walls that divide parts of the city into an older district, founded back in the Middle Ages, and a newer one. Traditional bullfighting can also be enjoyed in the town, especially since Ronda is home to one of the oldest bullfighting arenas in Spain, although this is an entertainment rather for people with strong nerves.

SUMMARY OF THE PROJECT

Euromind team did their best in order to deliver the best professional and cultural experience to the trainees of the project being always ready to help, give advice and solve any problems or doubts.

The trainees were fully satisfied with their work placements. They gained much needed professional experience abroad which is highly appreciated and sometimes even specifically asked by today's employers.

We have no doubt that our trainees will use their new knowledge and experience at their current work in their home country or increase their chances at the labour market and dazzle their future potential employers.

Moreover, the trainees learnt the basics of the Spanish language were able to work in a multi-cultural environment and proved themselves with the ability to work individually as well as in a team.

Euromind team was extremely satisfied with the trainees' involvement in the project and personal interest in whatever they participated in.

This project was very successful and we hope to realize other successful projects with Szkoła Policealna - Medyczne Studium Zawodowe im. Wandy Wacek Wsilewskiej w Biłgoraju in the future.
